

## The Smarter Banner Material

### What is SYCLTEX®

Sycltex® is a strong, lightweight banner material made without PVC and built to last. It's fully recyclable giving end users an option to keep their banner campaigns out of the landfill.

Compared to traditional PVC banners, Sycltex® offers greater durability, lighter weight, and a more sustainable end-of-life solution.

Every roll of Sycltex® is made in the USA using quality materials and manufacturing you can trust.

**PROUDLY MADE IN  
THE USA**

#### Benefits
